

ATTACH. #1

29 August 1963

CONFIDENTIAL

SCOPE OF WORK-----ADDITIONAL WING

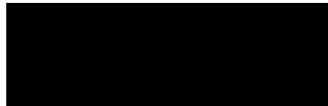

1. Provide additional wing 20X54' (1080 S.F.) to match the north east wing in dimensions, architectural details, fenestration, and fire door with the exceptions as follows:

- a. Entry-way to be 3'-0" where existing window.
- b. No interior finish, plumbing, or electrical, except that piping for hot water heat and pull-conduit for wiring to be carried into the wing and stubbed off.

The additional wing is to be located between the northeast wing and the existing central wing and is to be approximately 13'-8" from the north east wing. Additional site work includes the substitution of cast iron sewer pipe for the proposed concrete beneath the wing and a field relocation of a few feet of the proposed conduit pull box. The concrete walk is to be modified to provide walks to the two existing doors on either side of the new wing. The walks should parallel the wing.

3. Cost approximately \$7,000.
